# WaterGlow™ LED Lighting

*Lighting for Kasco's J & VFX Series Fountains & AF Series Surface Aerators*

Kasco's state-of-the-art LED Lighting Packages are an elegant and distinctive addition to our fountains and aerators. Available in composite or stainless steel housings, and in classic white or colored lenses, these easy to install LED lights deliver a pleasing and versatile look.

Modeled around extensive in-field testing and market research, these lights are engineered for performance and efficiency with corrosion-resistant housings and fixtures designed to minimize water entry points. Kasco's LED lights will withstand the test of time and add years of enjoyment to the water display.

## LED Lights in Stainless Steel Housings

The ultimate lighting solution for Kasco J and VFX Series Fountains and AF Series Aerators. Available for 1/2HP-7.5HP units, these durable and flexible lights will add nighttime drama and beauty to your water feature. Each 19 watt low-voltage fixture delivers a classic white color and is rated at nearly 1,700 lumens. Choose from 3 or 6 fixture packages to get the exact illumination you want. These lights run on standard 60 Hz power and are UL listed and CSA certified.

- **Model: LEDS19** - Cord lengths from 50 ft. - 500 ft.  
- Up to 1,700 lumens per fixture

*(Cords above are daisy-chained together)*

## LED Lights in Composite Housings

Flexible and affordable lighting for Kasco J and VFX Fountains and AF Aerators. These low-voltage lights run on 60 Hz power and are available with 9 watt or 11 watt fixtures. Choose from either 3 or 6 fixture packages; the 3 fixture packages are designed for 1/2HP-2HP units; the 6 fixture packages for 2HP-7.5HP units. Each fixture emits classic white color but amber, blue, green, or red lenses are included.

- **Model: LEDC11** - 11 watt fixtures, cord lengths from 50 ft. - 500 ft.  
- Up to 910 lumens per fixture
- **Model: LED3125** - 9 watt fixtures, cord lengths from 50 ft. - 500 ft.  
- Up to 525 lumens per fixture

# Kasco WaterGlow™ Halogen Lighting

*Lighting for Kasco's J & VFX Series Fountains & AF Series Surface Aerators*

Kasco's Halogen Lighting Packages add rich and dramatic lighting to your fountain or aerator. These highly-efficient, low-voltage bronze fixtures use MR-16 halogen lamps that brilliantly deliver a very pleasing, slightly warm white color. Red, green, blue and yellow bulbs are also available.

Kasco's halogen lighting features solid bronze housings joined at a submersible junction box with a power cable to match the length to the fountain. This allows Kasco's bronze lighting packages to only be partially submerged, allowing for proper cooling and reduced buildup of materials on the lenses.

## Halogen Lights in Bronze Housings

Kasco Halogen Lighting Packages are available in 50 Hz or 60 Hz power versions and are ETL listed to UL standards (50Hz models CE marked). These lights feature a built-in thermal overload protector on each fixture and a short circuit protector, allowing for long-lasting reliable operation in countless applications. All fixtures are 75 watts and feature a triple O-ring sealing along with a potted, molded junction box to minimize water entry points for leak prevention.

Choose from 2, 3, or 6 fixture packages; the 2 fixture packages are designed for 1/2HP and 3/4HP units; the 3 fixture packages for 1/2HP-2HP units and the 6 fixture packages for 2HP-7.5HP units.

- **Model LR275** - 60 Hz, 2 fixtures, cord lengths from 50 ft. - 500 ft.
- **Model LR375** - 60 Hz, 3 fixtures, cord lengths from 50 ft. - 500 ft.
- **Model LR675** - 60 Hz, 6 fixtures, cord lengths from 50 ft. - 500 ft.
- **Model LE275** - 50 Hz, 2 fixtures, stub cord
- **Model LE375** - 50 Hz, 3 fixtures, stub cord
- **Model LE675** - 50 Hz, 6 fixtures, stub cord

# WaterGlow™ Specialty Lighting

*Lighting for Kasco's xStream & 1/2HP-1HP J & VFX Series Fountains & Non-Kasco Brand Fountains*

Kasco offers specific lighting packages for our xStream Series and 1/2HP-1HP J and VFX Series Fountains, and for any fountain that's not Kasco branded. These flexible and easy-to-install lighting packages are the perfect solution to add drama and beauty to any water feature in a variety of applications.

Like all Kasco lighting products, these packages will deliver unparalleled durability, efficiency, and reliability.

## LED Puck Lights for xStream, J & VFX Fountains

This is a set of 8 LED pucks designed to nest into the float of Kasco xStream Fountains along with the 1/2HP-1HP J and VFX Fountains. These efficient low-voltage white lights have a life expectancy of over 50,000 hours. The complete kit includes a set of 8 lights, power cord, and a junction box. Extend the enjoyment of your Kasco fountain into the evening hours by adding a WaterGlow LED Puck lighting package.

- **Model: LED8012W** - Cord lengths from 50 ft. - 200 ft.

## Universal Lighting Packages for Non-Kasco Fountains

If you have an existing fountain or aerator and want to add Kasco quality lighting, this is the solution for you. These 4 fixture kits come complete with underwater rated power cords and universal mounting brackets. Choose from 9 or 11 watt fixtures in composite housings or 19 watt fixtures in stainless steel housings.

- **Model: LED4125** - 9 watts, composite housings, cord lengths in 50 ft. - 500 ft.
- **Model: LED4C11** - 11 watts, composite housings, cord lengths in 50 ft. - 500 ft.
- **Model: LED4S19** - 19 watts, stainless steel housings, cord lengths in 50 ft. - 500 ft.
