**2 Packets Treats One Acre,
4' - 6' Deep**

Net Contents:
24 oz (4 Packets)
530452 V2

**Crystal
Clear** 

**Easy
To Use**

NaturalBlue dye packets are formulated to provide ponds with a vibrant blue color. Two packets of NaturalBlue dye will treat up to one surface acre 4'-6' deep, for several months, depending on amount of rainfall and/or severity of sunlight. NaturalBlue dye packets should be used all year long.

Application Rates

Use 2-4 packets per surface acre, 4-6 feet deep, every 4-8 weeks or as needed.

How to Apply: Simply toss packets in several areas around the pond - no mixing required. Two packets of NaturalBlue Dye is equivalent to one gallon of other diluted pond and lake colorants.

When to Apply: For year-long beauty, apply in early spring. Water temperature has no effect on NaturalBlue dye and should be applied monthly or as needed to maintain a natural blue color all season long. Heavy rain and/or intense sunlight may require additional treatments of pond dye.

Water Use Restrictions: NaturalBlue dye packets may be applied to lakes and ponds used for irrigation and aquaculture. Water treated with NaturalBlue dye packets may be used for recreation, fishing and other activities immediately after treatment. Safe for recreational ponds, horses, livestock, birds, pets, fish, wildlife and the environment. Do not apply to water that will be used for human consumption.

Storage and Handling: Keep product in original container and closed when not in use. Wear rubber gloves when handling. Avoid contact with skin, eyes and clothing. Wash with soap and water after use. If ingested in large amounts, induce vomiting. For small cleanups and surface stains, use a diluted bleach solution.

Attention: Failure to use as directed, or sudden changes in water conditions not consistent with label, may result in the loss or injury of aquatic life. Airmax Inc. is not responsible for any loss of aquatic life.
